## **DETAILED ACTION**

### ***Claims Presented***

Claims 1-40 are presented.

### ***Allowable Subject Matter***

Claims 1-40 are allowed.

The following is an examiner's statement of reasons for allowance: As noted at pages 10, 11 of the outstanding amendment, the following are assumed for each claim of the application. Methods and systems of the present invention relate to verifying as valid a given message, information related to the given message, and/or a signature log, wherein these pieces of information are suspect of having been corrupted, have been lost and restored or the like. More specifically, log entries of the given message and its related information are registered in the signature log. Other messages and their related information are also registered in the signature log. Each of the log entries for the other messages, which are registered after the given message and/or its related information, includes cryptographic information of the given message and/or its related information. A message and/or its related information are verified as valid by generating cryptographic information for the given message, its related information and/or a log entry for the given message, and determining whether the cryptographic information is included in the log entries registered in the signature log for the other messages. Among others, but not exclusively so, one may note a signature log, wherein log entries

in the signature log include hash information for other log entries and the messages associated with these other entries. Moreover, one may note a verification technique for a message, data associated with the message, and/or a log entry by hashing previously logged entries in the signature log and verifying the inclusion of the hashed information in subsequent log entries in the signature log.

Such were not taught or suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The art made of record and not relied upon is considered pertinent to applicant's disclosure. The art disclosed general background.
